

How to control cat 'flu

Important: extra protection against cat 'flu

Your cat's routine vaccinations will help protect it against many diseases, but not Bordetella bronchiseptica (Bb).

Bb is one of the known causes of cat 'flu, and can be prevalent in catteries. It can be fatal in kittens. So please help us keep it out of this establishment by ensuring that your cat is vaccinated against Bb.

Please ask your vet for further information.
